Recidivism of rate at 6 months	Not applicable as program started in Feb
Recidivism of rate at 12 months	Not applicable as program operating only 6 month

Please add additional pages to comment on the following.

Please comment on areas such as the following; where women went to live upon being released from jail, employment, educational achievements, reunification with their children, community engagement, building positive relationships, and living in drug-free safe environments.

- *all of the enrolled women moved into private apartments Instead of public housing);*
- *only 1 woman has minor children and was reunited with them and her husband;*
- *Most of the women applied for and are receiving SSI;*
- *All but one woman is working either full or part time;*
- *All of the women are engaged in substance abuse treatment;*
- *All but one woman is still involved with Deter – one woman reached her max date but remains in treatment;*

Please comment on program's impact on the community collaboration process and community professionals accessing available training about best practices with this population.

- *During the rating period, we continued to work through operational details;*
- *We started to design our evaluation component "journey mapping";*
- *Our IWI core team became the "oversight" committee for the Deter Project – we relied on the committee to "staff" each of the women each month;*
- *Two members, including one woman, presented at the June NASADAD meeting in Burlington;*
- *I'm not yet certain of the impact on community collaboration affect although my sense is that there's a greater degree of commitment by participating organizations;*

Respectfully Submitted,

Don Mandelkorn
